

Clean cooking stoves in Malawi

Region: Nationwide/Malawi
Technology: Clean cooking stoves
Annual savings: 55 000 t CO₂
Project standard: Gold Standard VER (GS VER)
Validated by: TÜV NORD CERT GmbH
Verified by: Earthood Services Private Limited
Functionality:

By building clean cooking stoves made of metal and clay, energy can be better used for cooking and energy efficiency can also be increased. In addition, fuel and CO₂ can be saved. The project activity aims to distribute 41,472 cooking stoves in Malawi which are more efficient while less wood is being used.
